## Projects

### **Bezzflow**

Developed a responsive web application using **React.js, Next.js, Bootstrap, Context API, and Axios**. Built reusable UI components, integrated REST APIs, managed application state using the **React Context API**, and collaborated with the backend team to deliver scalable, high-performance frontend solutions while maintaining clean, efficient, and maintainable code to enhance the user experience.

### **TOUR TRACKER**

Developed a comprehensive tour management website using **React.js, MongoDB, HTML, and CSS**, implementing over 15 key features to streamline trip planning and management. Optimized application performance through efficient coding practices and asynchronous data fetching to enhance the overall user experience.

### **CRUD**

Developed full-stack CRUD (Create, Read, Update, Delete) applications using the **MERN Stack (MongoDB, Express.js, React.js, and Node.js)**. Built responsive frontend interfaces, developed RESTful APIs, integrated MongoDB for data management, and connected the frontend with the backend to implement complete end-to-end CRUD functionality.
